

Wearing conditions:

Daily and/or extended wear of lenses (maximum 7 days / 6 nights, depending on your eye care specialist recommendation), renewing them every two weeks.

 Menicon

 **Premio**

Lens care:

MeniCare™ Soft multipurpose replenishing solution, specially formulated for newest silicone hydrogel materials.

Use daily for cleaning, disinfecting, storing and rinsing your lenses.

Comply with the recommendations and **do not change your brand of lenses or multipurpose solution** without discussing it beforehand with your prescribing eye care specialist.

Change your lenses every two weeks for greater comfort !

Wear Menicon PremiO contact lenses

Wait no longer!

Your eyes can breathe
with Menicon PremiO
Silicone Hydrogel contact lenses,
renewed every two weeks.

Menicon PremiO lenses, developed from the latest Japanese research, ensure **maximum oxygen** transmissibility due to their ultrapermeable silicone hydrogel material, to keep healthy eyes. The Meni-Silk™ & Nanogloss™ Technology brings a remarkable moisture level with smooth lens surface.

The **comfort** of your lenses is increased:

- ✓ Throughout the day
- ✓ Even after hours using screens
- ✓ In air-conditioned atmospheres
- ✓ Late in the evening

Whether you are short-sighted, far-sighted or astigmatic, Menicon PremiO and PremiO Toric contact lenses guarantee excellent **quality of vision**, as soon as you insert them and **for as long as you wear them**.

You must replace them every two weeks.

Our **e-memo** service sends you a reminder by e-mail every two weeks.
